This report supplements NPIC/R-153/63, 1/ which discusses the Disna MRBM Complex, previously consisting of two Type I launch areas, a Type II launch area, and a rail-to-road transfer point.

The Disna Fixed Field MRBM Site (Figure 1) is located on low, level terrain in a forest 6 nautical miles (nm) north-northwest of Dernovichi and 7.7 nm north of Borkovichi. The earliest coverage of the field site was in

[REDACTED] On the latest usable prior coverage of [REDACTED] the site was not discernible.

Launch Areas No 1 and 2 were first apparent on [REDACTED] but did not appear complete until [REDACTED].

The third soft launch area was first noted on [REDACTED] in a probable late stage of construction. Its site support facility was not

altogether complete until [REDACTED] The fixed field site is situated 6.8 nm north-northwest of Launch Area No 3, 11.8 nm north-northwest of Launch Area No 2, and 13 nm north-northeast of Launch Area No 1.

The fixed field site (Figure 2) consists of four elongated padlike clearings, aligned in a direction approximately the same as that of the two soft sites. These clearings are

arranged on a U-shaped road network with another clearing positioned at the curve. No erectors or activity are discernible at the site.

The nearest rail siding is located at Bor-kovich, 7.7 nm to the south. This siding appears to serve the three associated launch areas as well. All are connected to the siding by good roads.
